

General instructions:

The finished block will be 12x12 inches. That means it will actually measure 12.5 x 12.5, and I'd recommend starting with a block of at least 14x14 and cutting it down.

The template this month does **not** include seam allowance. I've included both forward and reversed versions of the pattern. There's also a version designed to overlap.

I'd recommend some embroidery or couching embellishments to enhance the fins.

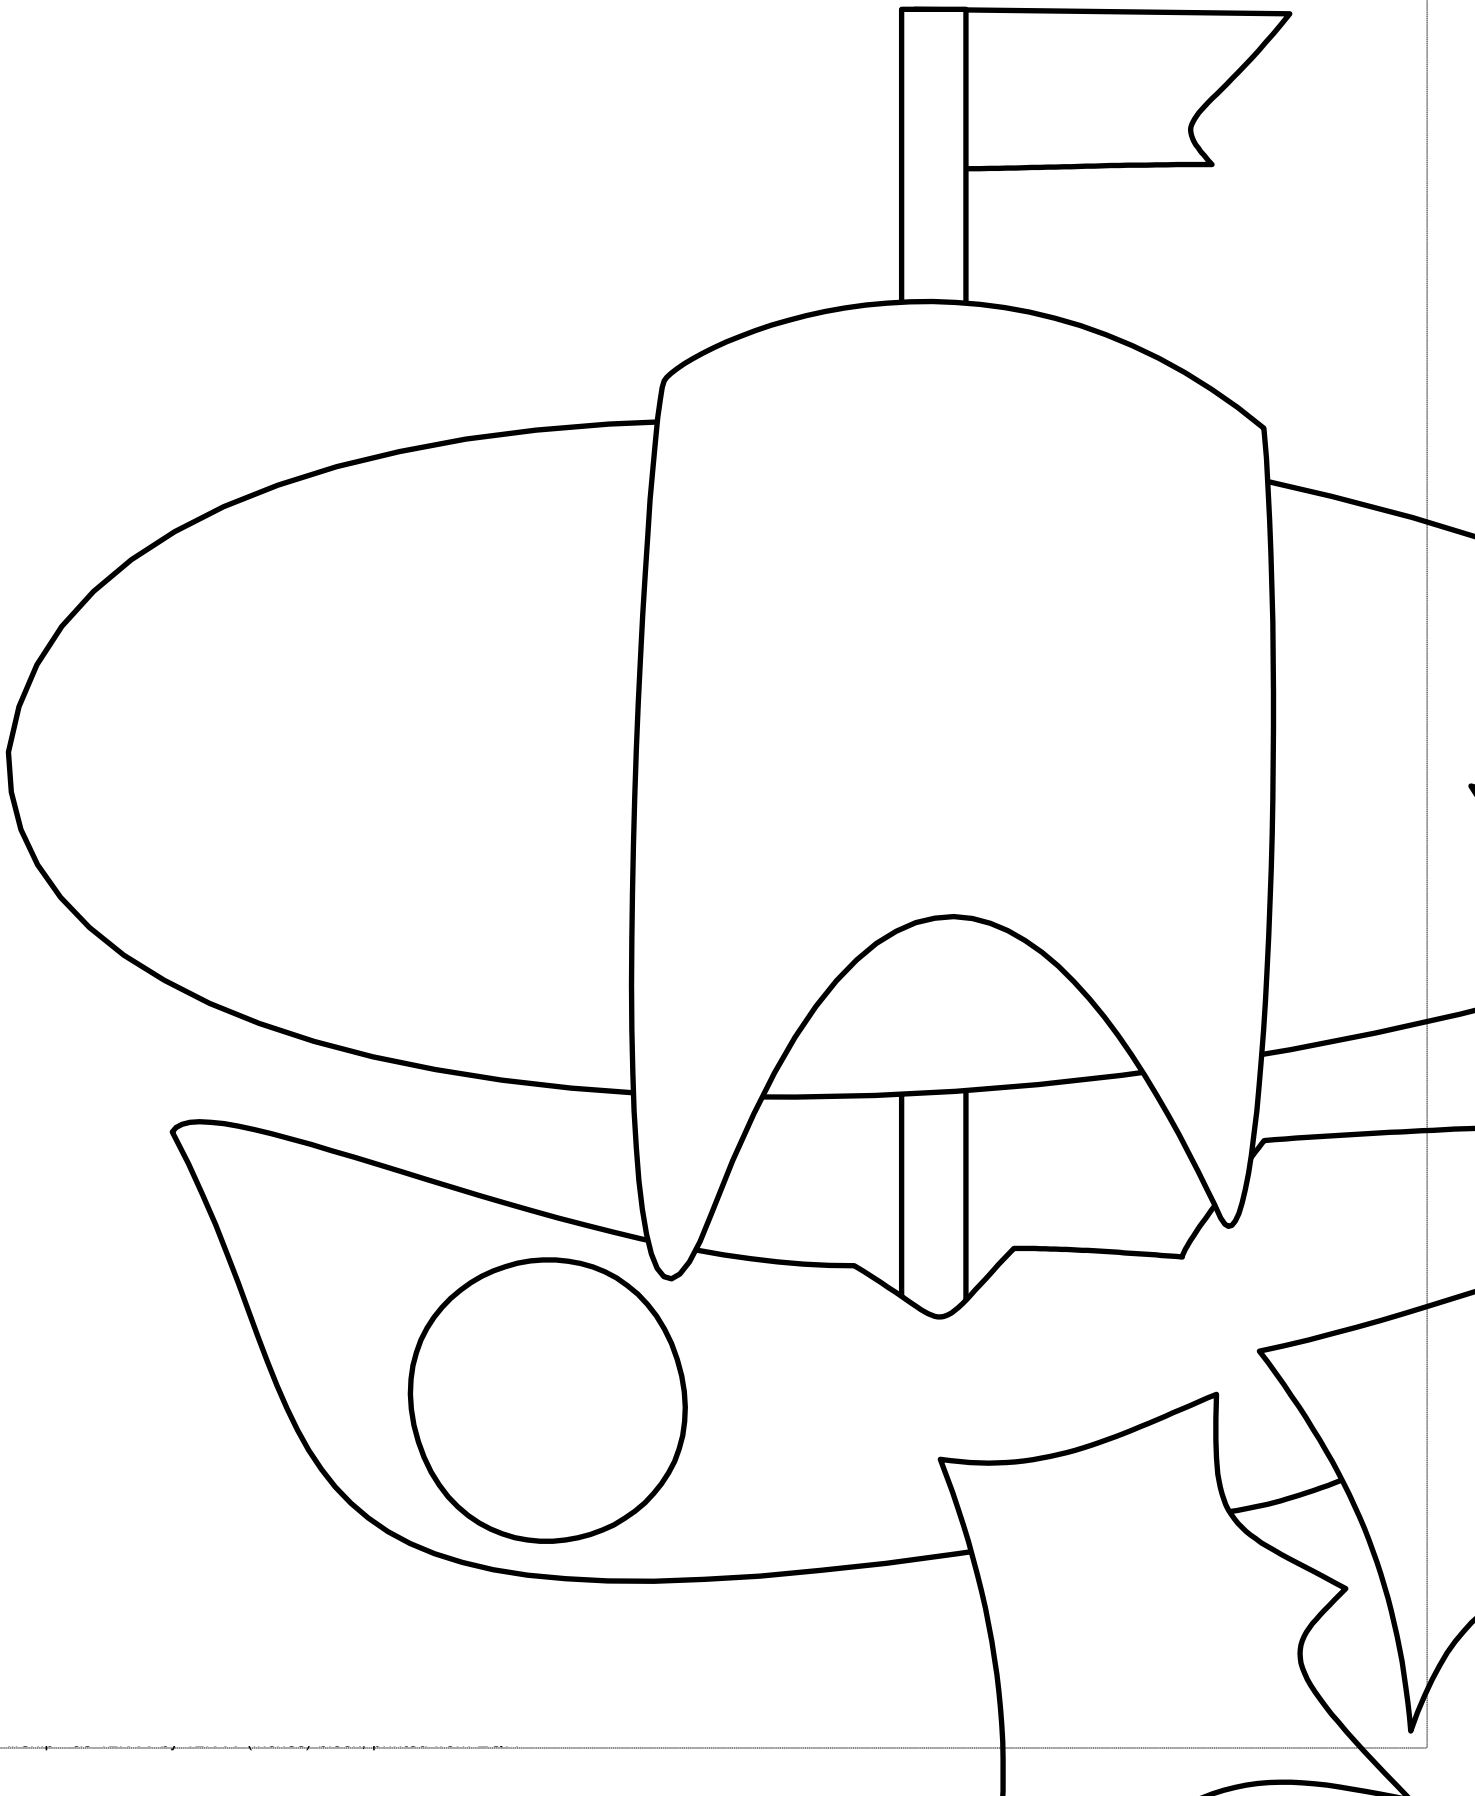

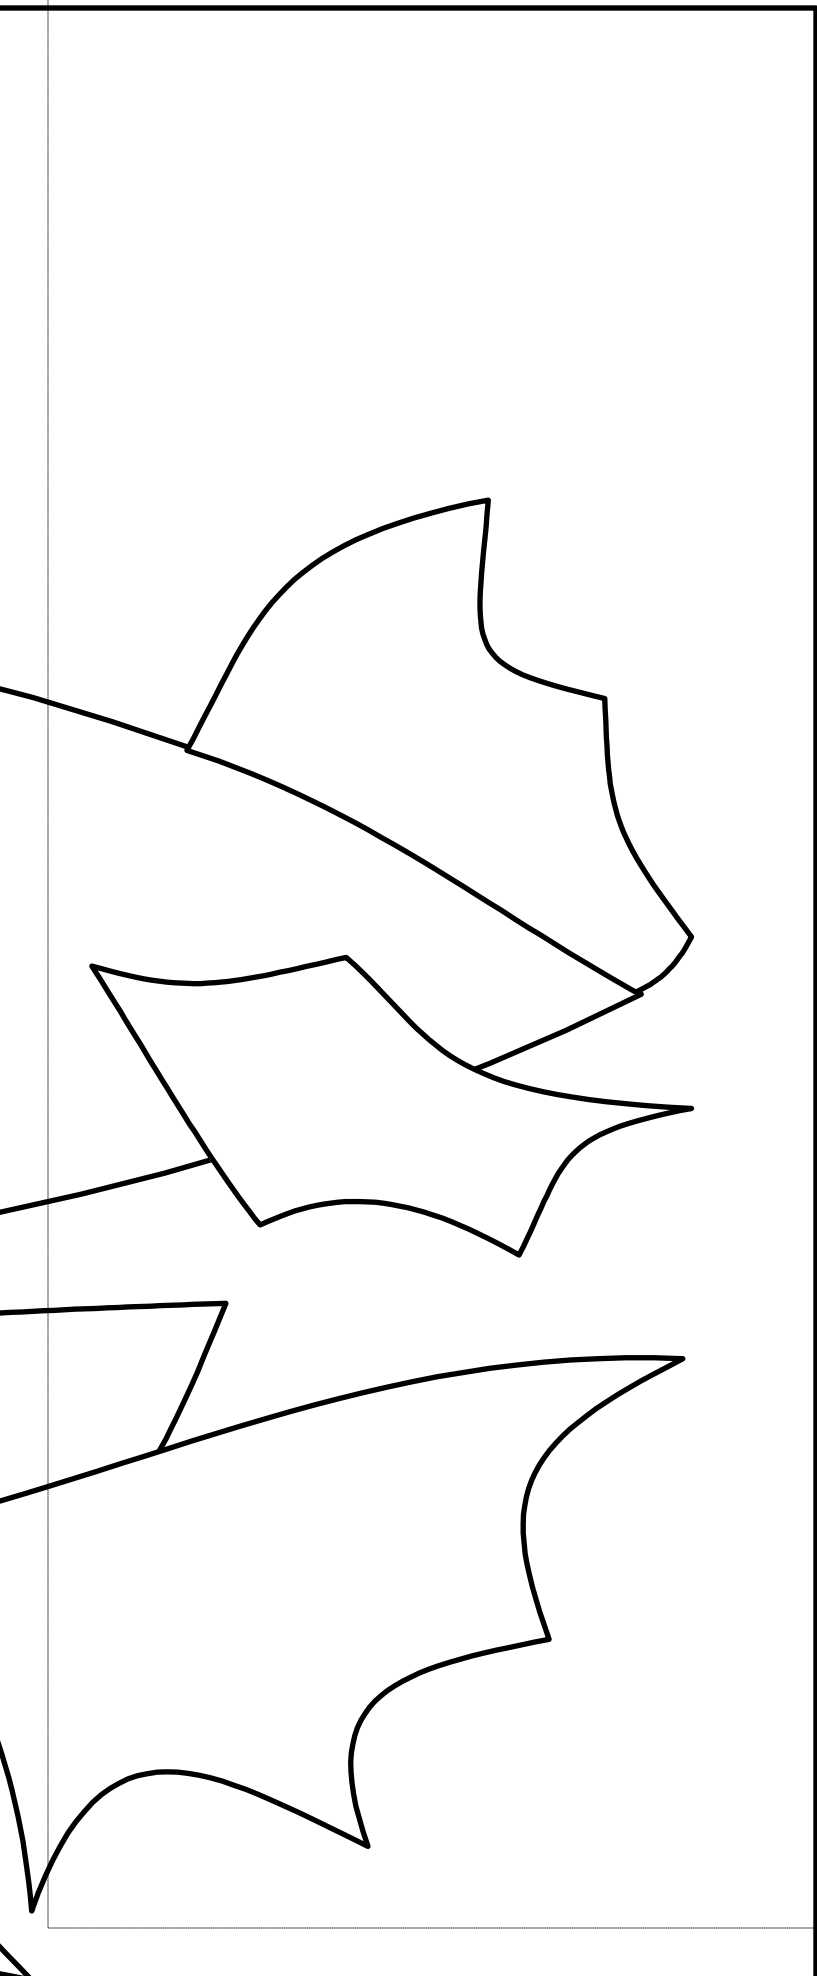

This template is part of the GeekMom 2013 block of the month. Feel free to download and use this pattern for sewing, but do not sell the pattern or redistribute it.
